

# GET AHEAD

at Songkran

## Holiday Programmes at Harrow Bangkok

### CERAMIC / CLAY ROBOTS ( Y5 - Y8 / Ages 9 - 12 yrs ) : Mr Iain Sands

Learn how to use clay and ceramic construction and modelling techniques to make a 3D robot from clay. Learn how to create textures and use ceramic slip and stains to decorate your robot. Gain an understanding of Ted Hughes' The Iron Giant and create a design inspired by the text.

#### Schedule: Week 1 (9th – 12th April 2018)

	Monday	Tuesday	Wednesday	Thursday	
1	In the morning students will look at Ted Hughes' The Iron Man and look at the descriptive language to describe the giant.	Students will use specialist tools and relief sculpture techniques to investigate a range of textures associated with their design and robot.	In the morning students will look at Ted Hughes' The Iron Man and look at the descriptive language to describe the giant.	Students will use specialist tools and relief sculpture techniques to investigate a range of textures associated with their design and robot.	
2	Students will design a robot based upon geometric shapes and collect textures through frottage techniques. The students will receive a basic introduction to clay and health and safety aspects associated. Students will prepare clay and learn about joining techniques.	Students will complete the construction, modelling and texture for their robot. Students can decorate using coloured slips and add some basic stains.
